

**UKRAINE DEVELOPMENT CHARITY
PRINCIPLES FOR THE DEVELOPMENT OF CITIZENSHIP
AND COMMUNITY DEVELOPMENT**

2 MARCH 2024

- The advancement of community development involves the empowerment of communities.
- Those communities will typically be socially and economically disadvantaged or excluded.
- Community development may additionally encompass the relief of loneliness, isolation and social exclusion.
- It may also encompass the development of community infrastructure, responsibility, volunteering and social inclusion.
- Promoting economic growth is not a principle of community development supported by the Ukraine Development Charity.
- Community development may include benefit to individuals, particularly those in need, if there is an identifiable public benefit.
- Community development may also involve a wider benefit to the public, particularly in relation to public amenities and utilities.
